NEWS RELEASE

The City of Freeport storm debris pickup will begin today July 15, 2024. Today will begin the first pass for picking up storm debris. Once the contractor has completed the first pass through the entire city, there will be a second pass to pickup any additional debris before completion. It is important to follow the requirements for placing your storm debris at the curb. Please separate vegetive debris, construction debris, demolition debris, household hazardous waste, electronic waste, and appliances/white goods. This will ensure efficient and safe pickup for the community.

Thank you for your patience and cooperation.
